(54) ORGANIC ELECTROLUMINESCENT ELEMENT, DISPLAY DEVICE, AND LIGHTING DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an organic electroluminescent element which has high emission luminous intensity and excellent quantum efficiency, and in particular has high durability, and to provide a display device and a lighting device each having the same.

SOLUTION: This organic electroluminescent material contains a substituted carbazole compound in an organic layer, and the content of a compound in which an amino group is bonded to a structure bonding to a carbazole ring existing in the layer as an impurity is less than 0.5 weight %.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]
